

MSDS – Articles exemption:

According to the Hazard Communication Standard of the Occupational Safety and Health Administration (OSHA), MSDS's are required for all hazardous chemicals; however, the Standard specifically exempts all "Articles" from this requirement [29 CRF 1910.1200(b)(6)(v)].

"Articles" by definition of the Standard, *“means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.”*

All Indelval rubber flooring and rubber stair treads are "Articles" according to the above definition, and therefore are exempt from the MSDS requirements.

MSDS are only required for Indelval adhesives and installation products.

Should you require additional information or clarification regarding this subject, please contact Indelval Technical Department.
